Canon

USB Flatbed Scanner

CanoScan®
D660U

- Built-in 35mm film adapter for negatives and slides
- 600 x 1200 dpi for prints
- 35mm film scanning at 1200 x 1200 dpi
- 42-bit for over 4 trillion possible colors
- USB connection to Mac® and PC

Photo And Film Scanning Made Easy.

Film and photo scanning has become a true pleasure. No adapter hassles. No add-on kits. Everything you need to create high-quality scans is built into the CanoScan D660U USB Flatbed Scanner. And all of it is available with the push of a scan button.

High-quality and convenience come standard.

Lift the cover, insert your slide or negative and press the external film scan button. The D660U scanner, with its built-in backlight, produces spectacular 1200 x 1200 dpi film scans using VAROS™ technology. In fact, it features a remarkable 42-bit resolution, making more than four trillion possible colors available for richer, more robust images. Press the second external scan button for convenient photo-print or document scanning at an impressive 600 x 1200 dpi—high-quality for Web sites, graphic-design projects, duplicating or archiving photos, or simply scanning text for integration into word-processing documents.

Easy start-up, right out of the box.

The only thing easier than using the D660U scanner is setting it up. A simple USB cable plugs into any compatible Mac or PC. Load the software—complete with step-by-step instructions—and you're ready to go. Plus, the included free software suite features numerous easy tools to help you create great-looking projects, enhance and manipulate photos, or integrate scanned text.

Mac
